DETAILED ACTION

- 1. Claims 1-32 are pending in this communication filed 09/25/06 entered as Petition to Revive Application granted. The petition was entered 8/28/06.
- 2. The Request for Reconsideration has been considered and the Non-Final Office Actions of 03/24/03, 1/16/04, 8/19/04, and 12/15/04 are hereby withdrawn in view of the new rejection as set forth here below. After a careful review of the claim limitations species or distinct inventions were found.

Election/Restrictions

- 3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-16, drawn to a method for producing a printed product, monitoring the sales management system, detecting the predefined sales event, generating event data, receiving the print data from a print facility, classified in class 707, subclass 1.
 - II. Claims 17-30, drawn to a system with a computer-implemented database monitor located at a corporate facility where the database monitor detects changes to the corporate sales management system, generates event data comprising information that describes the sales management event, and a print processing facility located at a geographic location different from the corporate location and coupled to the database monitor, classified in class 705, subclass 8.
 - Claims 31 and 32, drawn to a print process facility at a plurality of corporate locations each comprising a sales management system with the

09/479,918 Art Unit: 3694

print processing facility receiving from each of the plurality of corporate locations event data describing a predefined sales, comparing the event data to one or more predefined event rules that determine whether a printed product should be produced and in responding to a positive determination automatically generating a print order for the printed product using information extracted from the event data, classified in class 715, subclass 517.

This application contains claims directed to the following patentably distinct species I, II, and III. The Species are independent or distinct because Species I, claims 1-15 has a method for producing a printed product, monitoring the sales management system, detecting the predefined sales event, generating event data, receiving the print data from a print facility. Species II, claims 17- 30 have a system with a computer-implemented database monitor located at a corporate facility where the database monitor detects changes to the corporate sales management system, generates event data comprising information that describes the sales management event, and a print processing facility located at a geographic location different from the corporate location and coupled to the database monitor. Species III, claims 31 and 32 have a print process facility at a plurality of corporate locations each comprising a sales management system with the print processing facility receiving from each of the plurality of corporate locations event data describing a predefined sales, comparing the event data to

09/479,918 Art Unit: 3694

one or more predefined event rules that determine whether a printed product should be produced and in responding to a positive determination automatically generating a print order for the printed product using information extracted from the event data. Applicant is required under 35 USC 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently there are no claims that are generic or allowable.

Applicant is advised that a reply to this requirement must include an identification of the species elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP 809.02 (a).

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3694

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the species to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ella Colbert whose telephone number is 571-272-6741. The examiner can normally be reached on Monday, Wednesday, and Thursday, 5:30AM-3:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on 571-272-6712. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
